For 6-Month  
Sponsorship

## Animal Transport Sponsor

Here at HSLM, we do not have a **veterinarian on staff, or an on-site veterinary clinic available for our shelter animals.**

Because of this, our Animal Health team spends nearly **40% of their work day** driving our animals to and from partner vet clinics in London and surrounding communities. **On any given week, 30-40 animals require this essential transportation.**

Our HSLM vehicles are the only way we can pick up essential medications and transport our animals to their vet appointments, to ensure they receive the medical care they need in order to be ready for adoption!

The constant use of these vehicles means that they require fuel and regular maintenance to provide safe and reliable transit for the hundreds of animals in our care.
